## Biography

OG1 Support is the dedicated user guidance and advocacy account for OG1, the Professional Identity Platform for sports. The account exists to help coaches and sports professionals understand the platform, complete stronger OG1 Profiles, and take control of how their experience, credibility, accomplishments, philosophy, and story are represented.

Built with a sports-professional first mindset, OG1 Support provides clear answers, practical guidance, and timely follow-through across profile setup, platform navigation, best practices, and user feedback. The account serves as a trusted resource for helping users turn what they have already earned into a clear, credible identity that can be evaluated at a glance.

OG1 Support also helps connect user needs back to the platform team, making it a bridge between the OG1 community and the product experience. Its role is not only to answer questions, but to help coaches and sports professionals feel equipped, respected, and in control of their professional identity.
